

**Product Information:**

ADA ImPACT II Acoustical Wall Panels are designed for use in high abuse areas requiring sound reflection. A sheet of non-perforated co-polymer under the fabric allows sound to be reflected while withstanding many forms of punishment.

**Construction:**

This panel features a dimensionally stable 6-7 PCF fiberglass core with a 1/16" resilient non-perforated co-polymer face sheet. Panels are finished with Class A-rated fabric and arrive ready-to-install in any commercial application. Finishes are completely adhered to the face of the panel and returned to the back for a full finished edge. All corners are fully tailored. Finishes include fabric and vinyl.

**Size Availability:**

Available in 1/2", 3/4", 1", 1-1/2", 2", 3" and 4" thicknesses, plus 1/16" non-perforated co-polymer face sheet. We can accommodate custom sizes and shapes up to 5'x10'.

**Edge Detail:**

All edges are resin hardened, unless otherwise specified. Available choices include: square, radius, and bevel edges.

**Mounting:**

Standard mountings include spot and perimeter adhesive, Z-Clip, concealed splines, impaling clips, hook & loop, and Z-Bar to Z-Bar.

**LEED Eligible Product:**

Use of this product may help buildings meet green building standards as set by the Leadership in Energy and Environmental Design (LEED) Green Build Rating System.

**Flammability:**

Each component has been tested in accordance with ASTM E84 and has a Class I/A rating.

**Warranty:**

ADA ImPACT II Acoustical Wall Panels have a limited 1-year warranty starting from date of shipment. The panels are warranted to be free from defects in material and workmanship.

See product warranty for details and limitations.
